## Incoming Webhook

[Send feedback](#)

The Incoming Webhook connector enables external services to notify you about activities that you want to track. To use this connector, you'll need to create certain settings on the other service, which needs to support a webhook that's compatible with the [Office 365 connector format](#).

Fields marked with \* are mandatory

To set up an Incoming Webhook, provide a name and select Create. \*

Customize the image to associate with the data from this Incoming Webhook.

ตัวอย่าง code

```
var adaptiveCardJson = @"{
  ""type"": ""message"",
  ""attachments"": [
    {
      ""contentType"": ""application/vnd.microsoft.card.adaptive"",
      ""content"": {
        ""type"": ""AdaptiveCard"",
        ""body"": [
          {
            ""type"": ""TextBlock"",
            ""text"": ""Message Text""
          }
        ],
        ""$schema"": ""http://adaptivecards.io/schemas/adaptive-card.json"",
        ""version"": ""1.0""
      }
    }
  ]
}";
```

```
var webhookUrl = "webhook url ที่ copy เก็บไว้";
```

```
var client = new HttpClient();
```

```
client.DefaultRequestHeaders.Accept.Add(new
  MediaTypeWithQualityHeaderValue("application/json"));
```

```
var content = new StringContent(adaptiveCardJson, System.Text.Encoding.UTF8,
  "application/json");
```

```
var response = await client.PostAsync(webhookUrl, content);
```
